Roman M.

Chief Operations Officer | Driving Excellence in Blockchain Infrastructure at DedicatedNodes.IO

Georgia

Summary

✓ IT Enthusiast ✓ Customer Experience Specialist ✓ Talent Acquisition (HeadHunter) ✓ Team Building ✓ Be Myself

Experience

DedicatedNodes

Chief Operations Officer | Director of Customer Operations

March 2025 - Present (1 year 1 month)

Netherlands

Your one-stop solution for all blockchain infrastructure. Hardware and software experts at your service.

TRAE

Community Specialist | Pro-bono

January 2026 - Present (3 months)

Georgia

Volunteering as a Discord Community Specialist for the Vibe Coding Community at Trae.ai, where I help nurture an engaging, supportive space for developers exploring AI-powered coding workflows. My focus is on building conversations, organizing interactive discussions, and creating a collaborative environment that connects learners, creators, and innovators using Trae.ai's IDE platform.

Z.ai

Ambassador | Pro-bono

February 2026 - Present (2 months)

Georgia

Access to the latest technologies. Thorough testing and feedback on new AI agentic and coding models. The ambassadors team offers an invaluable help to further improve the agentic AI products.

QuadraNet Enterprises, LLC.

6 years 1 month

Customer Experience Manager / Supervisor / Remote Talents Hunting
September 2019 - March 2025 (5 years 7 months)
California, United States

Locating the ultimate talents for the IT roles within the organization.

Abuse Manager
March 2019 - March 2025 (6 years 1 month)
California, United States

QuadraNet was originally formed in 2001 as a telecommunications provider in Los Angeles and the surrounding areas. As our client base grew, we adapted to the evolving industries and expanded our service offerings over time to encompass a larger variety of Internet-based products and services.

We eventually grew to become a full-service data center provider, providing colocation, dedicated servers, cluster management, and complex hosting solutions. Over the past decade, with the assistance of very talented individuals, QuadraNet has grown to become one of the largest providers in Los Angeles, California for dedicated servers, colocation, cloud hosting, and bandwidth.

As of 2004, QuadraNet operates space in the LA Telecom Center building, located in downtown Los Angeles. The building is directly adjacent to the One Wilshire building at 624 South Grand.

One Wilshire is dubbed "The World's most connected data center building" due to its large concentration of fiber from various backbones and internet peers. QuadraNet has a private collection of over 400 fiber strands entering the One Wilshire Meet-Me-Room to our private cage.

As we have grown, we have had to expand our data center footprints and have found that building out individual data centers as we expand has proven to be to our advantage as we are able to segregate facilities from one another to provide redundancy, resiliency, and performance. With evolving cyber security threats and an increasingly complex regulatory environment, a greater emphasis is being placed on the relationships companies build with their chosen IT providers.

QuadraNet Enterprises, LLC. (Edge Centers Company)
Team Lead & Customer Experience Manager

Kowala (Blockchain Project)

1 year 10 months

Director Of Customer Success

January 2018 - November 2018 (11 months)

Full Time, Remote

Director Of Customer Success - Scope of work included:

- Customer Service, Personnel Recruitment & Training
- HelpDesk Monitoring & Escalations
- Manage a team of four technical support/service Personnel
- Technical Assistant to the marketing director

- Web-Conference Meetings Manager
- Community Support Manager

Kowala is the first autonomous decentralized stable coin on the blockchain to be based on consensus — not assets, Based on a protocol combining Ethereum's smart contracts with a lightning fast Proof of Stake consensus mechanism derived from Tendermint, Kowala's kUSD is a fully decentralized, stable cryptocurrency that tracks the US dollar using algorithms and market-based oracles instead of fiat assets to maintain its target value.

Director Of Customer Service / Helpdesk Team Recruiting
February 2017 - December 2017 (11 months)

Remote, Full Time

Director Of Customer Service - Scope of work included:

- Customer Service, Personnel Recruitment & Training
- HelpDesk Integration, Monitoring & Escalations
- Manage a team of four technical support/service Personnel
- Community Support Manager

The Kowala Protocol is a family of algorithmic stable-value cryptocurrencies designed to keep parity with fiat currencies or other assets as described in The Kowala Protocol: A Family of Distributed, Self-Regulating, Asset-Tracking Cryptocurrencies.

Independent blockchains based on Ethereum's Go client

Fast-finality (1 second confirmations)

On-chain dynamic validator set management (registry/in-protocol penalties) via genesis smart contracts

Fintech Industry (NDA)

Content Assistant (Pro Bono)

July 2016 - August 2016 (2 months)

Remote

Written articles about manual and automated trading products and tested trading solutions for performance under a demo environment in order to write about it an objective technical feedback.

This was a good experience which has allowed me to gain knowledge about the FinTech market and the technologies it has to offer.

Startup Education Project based in Canada (NDA)

Content & Creative Consulting (Pro Bono)

July 2016 - July 2016 (1 month)

Toronto, Canada Area

Pro-Bono Volunteering with a global education project, writing content and providing suggestions towards improvements and optimization of the project structure, roadmap and assisting with the private presentations which later on used by the CEO during his meetings with potential partners and investors. The project is about uniting technology, great minds, experts and volunteers together to bring a positive impact to the worldwide education sector.

Remote Employment for IT Industry

Remote IT Recruiting (Pro Bono)

June 2016 - July 2016 (2 months)

Canada

Experience based volunteering:

- Interaction with IT companies.
- Unique Content writing.

An innovative service based on a new recruitment model focused on finding you the best individual for the job, not limiting ourselves to any geographic area.

This individual essentially works directly under your management, communicating in real time and working by the same processes and core values as all your company's local employees.

WIZZSOLUTIONS.COM GROUP LLC

Project Manager for international cloud computing customers, working with company partners, design custom solutions, leads generation for business and private sphere customers, management of GoogleAds promotions, consultancy in outsourcing and unique products design.

Data Center Operations Provider

International Branch Manager | Data Center Services Company

January 2007 - September 2011 (4 years 9 months)

Florida Area (NDA)

Assistance in talent sourcing, team lead of onsite and remote staff members, being involved during the planning and execution of the environment that

allows high quality none interrupted Technical Support, Customer service and assurance of end user experience.

Internal consulting for marketing strategies and product design, lead coordinator of partnerships global providers and facilities that became later on into a crucial part of the business development.

Lead of the sales department, development of unique offers within the high-bandwidth field.

As part of a strategic business optimization effort, it was decided that the overseas branch would be merged into the main office within the US. This included moving all of the infrastructure and customers to the US office. Unfortunately, this meant that I had to leave my role as the overseas branch was closed. However, I am proud of the work that we accomplished during my time in this role and am grateful for the opportunity to be a part of such a significant restructuring effort.
